## Ultrasound and CT Guided Interventions Course

This 2-day image guided interventions course will equip you with the essential knowledge and hands-on skills to be able to comfortably and safely perform ultrasound and CT guided interventions.

In today's landscape, interventional radiology plays an important role in patient care. Being comfortable with basic to advanced techniques will enhance your ability as a Radiologist and improve patient outcomes.

This course is recommended for residents wanting to apply to the radiology program, current radiology trainees wanting to expand and practice their skills in a safe environment, as well as radiology consultants wanting to advance and expand their skillset.

### Topics covered include:

- Ultrasound guided wrist, hand and digits procedures.
- Ultrasound guided elbow and shoulder procedures.
- Ultrasound guided hip and knee procedures.
- Ultrasound guided ankle, foot and digit procedures.
- Ultrasound guided advanced nerve blocks.
- CT guided cervical, thoracic, lumbosacral and coccygeal spine procedures.
- CT guided shoulder, hip, knee and ankle procedures.
- CT guided MSK and advanced nerve block procedures.

### COURSE HIGHLIGHTS:

- Image guided injection techniques.
- Knowledge and skills required for hospital and private practice.
- High yield theoretical and practical workshop.
- Live demonstrations.
- Hands-on cadaver workshop held at **Griffith University**, School of Anatomy.

### WHO SHOULD ATTEND:
